

***NCC states how "It has worked perfectly. We wish we had the system from the start, everyone should have it!"***

*- Site manager Jan Ericsson, NCC Construction Sweden AB*

IN ONE OF LINKÖPING'S MOST BEAUTIFUL AREAS, SÖDRA EKKÄLLAN, A COMPLETELY NEW DISTRICT WAS TO BE BUILT. "PARKVILLORNA" WAS CONSISTING OF 180 APARTMENTS AND TO BE COMPLETED WINTER 2012.

### THE PROBLEM

The construction started in August 2010 and they experienced problems with theft early on. Intruders stole and caused damage and stoppage for ten thousands of euro. They had been using surveillance cameras and patrolling security guards but nothing seemed to help.

### THE SOLUTION

In Oktober they decided to contact Mindmancer for help. A contract was written and the camera system was installed within a week. It was not long before the thieves came back. However, this time without luck. Mindmancer's cameras detected them as soon as they entered the site and the security guards were contacted instantly. Guards could that way be sent to the site quickly and get rid of the intruders.

### THE RESULT

The number of break-ins went down quickly after the Construction Guard was installed. After a few weeks the number of crimes had decreased to one per month. The crime rate has stayed on this level ever since and now, nine months later, there are hardly any break-ins at all. Furthermore, these incidents did not result in any damage since the thieves were frightened off once the security guards arrived. NCC also saved money by suspending patrolling guards. However, one consider the greatest triumph to be not having to worry about stoppage and delays that often are the effect of break-ins.

#### Customer profile - NCC

NCC is one of the leading construction and property development companies in the Nordic region. They had sales of SEK 49 billion in 2010, with approximately 17,000 employees. Mindmancer has monitored NCC's construction sites since April 2009.
